

THE ARCTIC - GEOGRAPHIC NORTH POLE & EAST GREENLAND | LE COMMANDANT CHARCOT

INTRODUCTION

Embark on a once-in-a-lifetime expedition to the North Pole, navigating through the ever-changing ice floes and experiencing the pristine beauty of the Arctic. Your journey takes you from the breathtaking landscapes of Spitsbergen to the majestic fjords of Nordaustlandet, offering encounters with diverse wildlife such as whales, walruses, seals, and polar bears, as well as the rich Inuit culture of Ittoqqortoormiit. As you sail along Greenland's icy coast, you may witness the mesmerizing Northern Lights and explore the remote Blosseville Coast. You'll be immersed in the silent, icy, and stunning wilderness of one of the world's most isolated regions, creating unforgettable moments and a deep appreciation for the Arctic's unique splendor.

With special guests Cindy Miller Hopkins, American Photo Ambassador, navigate to 90 degrees North!

A professional travel and wildlife photographer with 25 years of experience and over 6,000 publications. Her work appears in textbooks, travel guides, calendars, fine art prints, consumer goods, and periodicals worldwide. She has traveled to over 150 countries and all seven continents through freelance, assignment, and workshop projects. Notably, she captured the only known photograph featuring five different penguin species in one frame during a 2018 campaign to protect South Georgia and the South Sandwich Islands. Join her workshops to capture your holiday memories with expert guidance.

THE ARCTIC - GEOGRAPHIC NORTH POLE & EAST GREENLAND | LE COMMANDANT CHARCOT

DAY 1: Fly from Paris to Longyearbyen & Embarkation

A charter flight will take you from Paris to Longyearbyen, where you will then embark from 4:00 pm to 5:00 pm, and departure at around 6:00 pm. Longyearbyen is the capital of the Norwegian Svalbard archipelago, located on Svalbard's main island, and is the northernmost territorial capital on the planet. With winter temperatures dropping to below 40°C, the landscapes of this mining town are simply breathtaking. The glaciers, the mountains stretching as far as the eye can see and the untouched nature, make you feel like you're in completely unexplored territory.

DAY 2: South-west region of Spitsbergen

Set sail for southwest Spitsbergen, immerse yourself in this environment unlike any other and explore its unexpected riches. In this natural sanctuary, the polar light combines with the changing weather of the Arctic, a big blue sky, the horizon scattered with clouds, the enveloping mist erasing the border between the land and the sea. Follow in the footsteps of the first explorers and admire the majestic fjords and glaciers sculpting the breathtaking landscapes, their icy waters shimmering beneath the midnight sun. The fjords, veritable cathedrals of ice, reveal their millennial secrets, while the glaciers, like sleeping giants, move slowly towards the sea, setting free sparkling icebergs. On the water, you might spot belugas and rorquals, while on the shores, seals and Arctic foxes add a touch of mystery to this living tableau, where the steep cliffs become breeding grounds for thousands of seabirds, like guillemots. Southwest Spitsbergen is an ode to nature in its rawest and purest form.

DAY 3: North-west region of Spitsbergen

A kingdom of contrasts and natural marvels dotted with islands and peninsulas, northwest Spitsbergen fascinates with its preserved beauty. On these pristine lands, infinity unveils itself, treating the eyes to beauty sculpted by nature and enhanced by the changing light. The fjords bathed by icy waters, the jagged mountains and the imposing glaciers stand majestically before you, like monumental sculptures. In these lands, where souls are filled with deep serenity, only the murmur of broken ice, bearing mysteries and legends, disturbs the calmness. Aboard our Zodiacs and in the company of naturalist-guides, get as close as possible to this unique fauna and discover this centre for scientific expedition departures. In the distance, majestic whales glide silently through the glacial waters, whereas seals, walrus and Arctic foxes add a playful touch of life. As Svalbard reindeer wander the vast expanses, Arctic terns liven up the polar sky with their gracious flight and polar bears, which you may be lucky enough to see, patrol magnificently along the icy shores.

DAY 4: Navigating through the ice sea - Day 4 to 7

Enjoy the absolutely unique experience of sailing to the heart of the ice floe, this vast expanse of virgin, immaculate ice. The landscapes are constantly changing, shifting from a smooth, flat wilderness to a chaos of ice, then to channels of open water. Your ship will sail along these naturally open channels and through the areas where the frozen layer is thinnest, offering you the chance to experience magic maritime moments in the midst of drifting sea ice. It will also often be an opportunity to see a particular kind of fauna, totally dependent on the ice floe.

DAY 7: The Geographic North Pole

Defined by a 90° North latitude, the Geographic North Pole lies on the Earth's rotational axis, at the intersection of all meridians. Plunged into darkness for six months of the year, then lit by the sun for the following six months, this mythical site, permanently covered in ice and remote from any land, has fascinated generations of explorers. So far, only a very few people have ever reached it: an exploit which is now accessible to you aboard Le Commandant Charcot.

THE ARCTIC - GEOGRAPHIC NORTH POLE & EAST GREENLAND | LE COMMANDANT CHARCOT

DAY 9: Navigating through the ice sea - Day 9 to 11

Enjoy the absolutely unique experience of sailing to the heart of the ice floe, this vast expanse of virgin, immaculate ice. The landscapes are constantly changing, shifting from a smooth, flat wilderness to a chaos of ice, then to channels of open water. Your ship will sail along these naturally open channels and through the areas where the frozen layer is thinnest, offering you the chance to experience magic maritime moments in the midst of drifting sea ice. It will also often be an opportunity to see a particular kind of fauna, totally dependent on the ice floe.

DAY 12: Sailing ice floes along Greenland

The north-east of Greenland is renowned for being home to one of the oldest and thickest layers of ice on the planet. Aboard your ship, you will have the unique opportunity of sailing to the heart of this icy wilderness, many thousands of years old, and will travel along one of the world's most isolated coasts, between drifting ice and blue icebergs.

DAY 13: Ittoqqortoormiit - Day 13 & 14

On the East coast of Greenland, in the Ittoqqortoormiit region that is covered with snow and ice for nine months of the year, you will have the rare opportunity of immersing yourself in the heart of an isolated territory and exploring the beauty of its infinite polar whiteness. The high alpine mountains punctuate the sky and gradually reveal their dark rock edges beneath a coat of snow. Located at the entrance to the longest system of fjords in the world, sits the village of Ittoqqortoormiit, one of the northernmost inhabited places on the East coast. Its name means 'great house' in Greenlandic and it is home to the last hunters of the polar region, whose ancestral way of life you will encounter. As soon as the thickness of the ice floe allows it, the hunters set out on the trail of walruses, seals, narwhals, musk oxen and polar bears, travelling by traditional dog sleds. On these expanses of immaculate snow, the silence is broken only by the sounds of the dogs, the grating of a sled coming back from a run or of footsteps on the ice. You will discover Inuit traditions through privileged and festive moments on the ice floe and in the village.

DAY 15: Exploring the Blosseville Coast

Aboard your ship, follow in the footsteps of Jules Poret de Blosseville, a French explorer and sailor. In 1833, he set off to discover this isolated and unexplored part of eastern Greenland aboard La Lilloise, an adventure with a fatal outcome. The uninhabited territory that bears his name lies to the south of Scoresby Sound. Surrounded by ice, icebergs and pack ice - thin or thick, flat or pronounced - as far as the eye can see, Blosseville Coast is a wild and distant place to which very few people have access. Exploring it means a slow immersion into the heart of a frozen, almost unreal desert, where the variations in light transform one's perception of the landscape. In the kingdom of the polar bears, Le Commandant Charcot, a silent ship open to the exterior, will offer exceptional moments observing Arctic wildlife, through a series of encounters.

DAY 16: At Sea

Spend exceptional moments sailing aboard Le Commandant Charcot, the world’s first luxury polar exploration vessel and the first PC2-class polar cruise ship capable of sailing into the very heart of the ice, on seas and oceans which the frozen conditions render inaccessible to ordinary ships. Le Commandant Charcot is fitted with oceanographic and scientific equipment selected by a committee of experts. Take advantage of the on-board lectures and opportunities for discussion with these specialists to learn more about the poles. Participate in furthering scientific research and let us discover together what these fascinating destinations have yet to reveal to us.

DAY 17: Disembark in Reykjavik

Arrive early in Reykjavik and disembark around 8am. Iceland’s capital stretches along the edge of a vast bay in the west of the country. Perlan, the “Pearl of Reykjavík”, a museum located on ‘Oskjuhlíð hill, offers a panoramic view of the lush, green landscapes. A little further, one can easily spot the signpost showing the way to the evangelical Hallgrímskirkja church, and to the historical centre where one can stroll along the Skólavörðustígur and the Laugavegur, two lively streets with charming small shops. For some relaxation just outside of the city, visitors have the opportunity to visit the Reykjanes peninsula and its famous thermal lagoons of the Blue Lagoon.
